- ▲ Gas-Fired Thermal: in development
- Energy Recovery Generation: in operation
- Municipal Solid Waste: in operation

The Clean Energy sector has helped power the BC economy.

- Nearly \$9 in private investment.
- Over 17,000 jobs created.

The Clean Energy sector provides benefits to local communities.

- Investments during support well-paying jobs in local communities.
- Projects generate long-term, significant tax revenue for local government.

Our sector creates opportunities for First Nations.

- In a time when there is concern regarding the development of some resource projects, First Nations are advocating for more partnerships with our sector.
- Our sector aligns with the values of First Nations.
- Source of employment, training, and revenue.
- Can be a catalyst for economic development and independence.

Quality Wind, Capital Power Corp.

Quality Wind, Capital Power Corp.

How we can support the clean energy sector

- Support policies that encourage electrification in order to grow load and reduce industrial emissions.
- Encourage government and BC Hydro to seize on export opportunities for BC's clean electricity.
- Use BC's clean energy advantage to attract new business.

Thank-you!
